Cravinhos, November 9, 2017 – Ouro Fino Saúde Animal Participações S.A. (the “Company” or “Ourofino”) (B3: OFSA3), which is mainly engaged in the research, development, production and sale of veterinary drugs, vaccines and other products for production and companion animals, announces its financial results for the period ended September 30, 2017 (3Q17 and 9M17).

## Message from management

Based on the results achieved in the quarter, we are confident that in 2017 the Company will resume its historical levels of profitability. Our gross margin reached 55%, with adjusted EBITDA margin and net margin of 23% and 10%, respectively, showing improvement in our indicators. The generation of cash from operations remains strong and totaled R\$ 95 million in accumulated figures for the nine-month period of 2017, that is, virtually twice the amount for the same period in the previous year.

With respect to production animals, the gross margin of 52.5% reached its highest level since the 3<sup>rd</sup> quarter of 2015, as a result of the work that has been made focused on increasing profitability. However, the growth in revenues in this segment was adversely affected by a significant concentration of sales at the end of September, which were not recognized in the quarter due to lack of time to deliver goods to customers within the period. We emphasize that these sales have already been delivered and recognized in the beginning of October and will be included in the results for the 4<sup>th</sup> quarter.

As regards companion animals, we highlight the increase of 40% in net revenue and an increase of 6.6 percentage points in the gross margin in comparison with the 3<sup>rd</sup> quarter of 2016. We remain aware of the Brazilian macroeconomic situation and have monitored channel inventory levels to maintain sustainable growth.

With respect to international operations, gross margin increased 3 percentage points and reached 56%, with increased sales in Colombia and Mexico, which partially offset a reduction in sales in other countries, notwithstanding the significant exchange loss that has been taking place throughout the year.

Selling, general and administrative expenses were reduced by 10%, with dilution over net sales revenue of 5 percentage points in the quarter. In the accumulated figures for the nine-month period there was a reduction of 13% and a dilution of 4 percentage points, which is in line with the efforts that have been made by the Company to optimize expenditures.

In the quarter, our net debt decreased even more due to the generation of cash from operations and repayment of debt indexed to the CDI rate, as we have been anticipating since the beginning of the year and have communicated to the market. As a result, the cost of debt was reduced to 7% in local currency and our leverage level returned to 3.2x EBITDA (accumulated figure for the 12 months). We expect to improve this indicator even more in the next quarter.

We remain confident of delivering annual results that are consistent with our initial expectations, as well as generating value to stockholders based on the Company and markets' exceptional growth drivers

- The Production Animals segment presented net revenue of R\$ 104.2 million in 3Q17, an increase of 1.7% in comparison with 3Q16. In 9M17, net revenue was R\$ 264.5 million, a decrease of 6.6% in comparison with 9M16. The periods were impacted by the non-recognition of revenues, as discussed above.
- The Companion Animals segment had net revenue of R\$ 15.7 million in 3Q17, an increase of 40.2% in comparison with 3Q16.

In 9M17, net revenue was R\$ 46.5 million, an increase of 8.4% in comparison with 9M16. These results show market recovery with proper inventory levels at distributors.

- The International Operations segment presented net revenue of R\$ 10.3 million in 3Q17, a decrease of 12.7% in comparison with 3Q16. We would point out that in 3T16, there were significant non-recurring sales of vaccines against foot-and-mouth disease to Paraguay. In 9M17, net revenue was R\$ 32.3 million, an increase of 0.6% in comparison with 9M16. Foreign exchange losses had a significant impact on prices, in spite of the increased volume in the accumulated figures for the nine-month period.

increase of 6.3 p.p. in comparison with 3Q16, due to the impact of the better mix. In 9M17, gross margin was 70.3%, a decrease of 0.8 p.p. in comparison with 9M16, with effects of the provision for inventory losses.

## Finance result

R\$ million	3Q16	3Q17	Variation %	9M16	9M17	Variation %
Finance result, net	(4.4)	(4.0)	-9.1%	(15.8)	(12.6)	-20.3%

In 3Q17, net finance costs totaled R\$ 4.0 million, a decrease of 9.1% in comparison with 3Q16. In 9M17, these costs totaled R\$ 12.6 million, a decrease of 20.3%. This was due to a higher generation of cash in the nine-month period, resulting from the adjustment in the policies

related to the term of receivables and lower levels of expenses, combined with lower pressure from capital expenditures (CAPEX). As a result, there was a reduction in net debt, which reached R\$ 264.6 million in 4Q16 and totaled R\$ 205.2 million in 3Q17.

## Income tax and social contribution

In 3Q17, income tax and social contribution totaled R\$ 6.8 million. In 9M17, it amounted to

R\$ 10.3 million. This increase resulted from higher profitability.

In 3Q17, adjusted profit reached R\$ 13.5 million, an increase of 84.9% in comparison with 3Q16. In 9M17, adjusted profit was R\$ 22.5 million, an increase of 90.7% in comparison with 9M16.

These results reflect an increase in EBITDA adjusted by the factors mentioned above, in addition to the decrease in net finance costs.
